Citi Dynamic Asset Selector 5 Excess Return Index

Strategy Overview

The Citi Dynamic Asset Selector 5 Excess Return Index (the "Index") employs a rules-based, hypothetical investment methodology that aims to identify and navigate different US equity market conditions. The Index:

- Dynamically allocates between two futures-based indices: S&P 500® Futures Excess Return Index and S&P® 10-year US Treasury Note Futures Excess Return Index
- Allocates to the abovementioned indices by utilizing equity price and equity volatility signals
- Adjusts exposure, as frequently as daily, between a US equity futures index and a US Treasury futures index according to the identified market regime
- Employs a daily volatility target mechanism that seeks to maintain a 5% annualized volatility
- Is calculated daily by the S&P Dow Jones Indices LLC by which a 0.85% per annum fee is deducted on each Index business day

This material may include discussions of securities or financial products that InspereX may have positions, long or short, or held proprietarily. InspereX may execute transactions which may not be consistent with any discussion or conclusion contained herein. InspereX may also have received compensation for performing investment banking services or be (or has previously been) engaged in soliciting or performing other services for the issuer(s) of the securities discussed herein. Further, InspereX may have received compensation as a manager or co-manager in a public offering for the issuer(s) mentioned herein.

The investment products discussed herein are considered complex investment products. Such products contain unique features, risks, terms, conditions, fees, charges and expenses specific to each product. The overall performance of the product is dependent upon the performance of an underlying or linked derivative financial instrument, formula, or strategy. Return of principal is not guaranteed and is subject to the credit risk of the issuer. Investments in complex products are subject to the risks of the underlying reference asset classes to which the product may be linked, which include, but are not limited to, market risk, liquidity risk, call risk, income risk as well as other risks associated with foreign, developing or emerging markets, such as currency, political, and economic risks. Depending upon the particular complex product, participation in any underlying Market-Linked Product is subject to certain caps and restrictions. Any investment product with leverage associated may work for or against the investor. Market-Linked Products are subject to the credit risk of the issuer. Investors who sell complex products or Market-Linked Products prior to maturity are subject to the risk of loss of principal, as there may not be an active secondary market. You should not purchase a complex investment product until you have read the specific offering documentation and understand the specific investment terms, features, risks, fees, charges and expenses of such investment.

The information contained herein does not constitute an offer to sell or a solicitation of an offer to buy securities. Investment products described herein may not be offered for sale in any state or jurisdiction in which such an offer, solicitation or sale would be unlawful or prohibited by the specific offering documentation.
